

QD Power

OE Elsafe's QD power series is a unique socket outlet system that is designed to integrate with and compliment the latest contemporary and innovative furniture on the market.

Both the duet (2 gang) and quartet (4 gang) have been designed with multi directional sockets which make it possible for almost any type of charger or battery pack to be used simultaneously.

All QD power series units have 10amp, 240V auto-switched sockets. The QD power series can be mounted into panels from 0.8mm to 2.6mm thick and if the QD is required to fit into thicker panels, OE Elsafe has designed a stylish thick panel frame to accompany the QD series.

QD power TECHNICAL

QD power features:

- The 4 gang QD incorporates multi directional sockets to allow for an array of chargers and battery packs.
- All of the QD power series have incorporated 4 flexible yellow retaining clips which can secure into panels up to 2.6mm Thick.
- All the QD power series sockets are auto-switched
- Contains high quality welded copper busbars
- High-Impact polycarbonate face plate.
- Standard colours include: Black, White, Soft Grey and Red. Other colours may be available on request subject to minimum order.

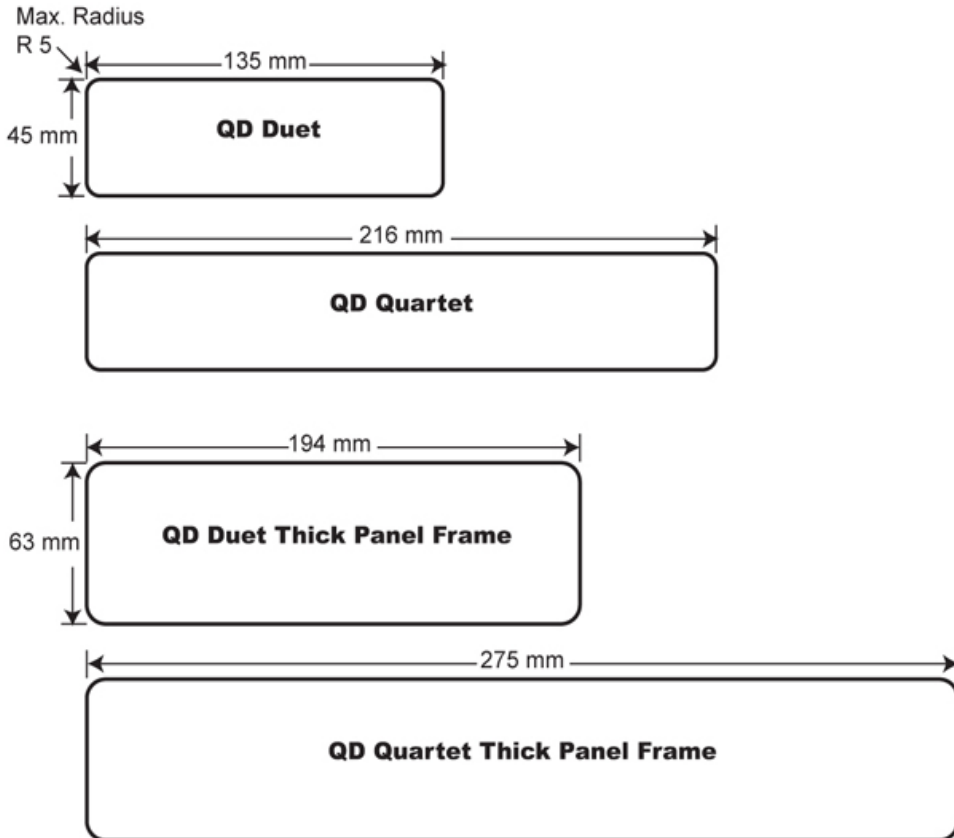

Technical:

- Socket outlets are rated 10amp and 240V
- Various thickness panel mounting options
- 20amp Wieland GST connectors: to suit Wieland GST cabling, which are low profile and re-wirable
- Clear polycarbonate body / copper internal busbar

Product	Dim A (mm)	Dim B (mm)	Panel Thickness (mm)
Duet Power	135	45	0.8 - 2.6
Quartet Power	216	45	0.8 - 2.6
Duet Thick Panel Frame	194	63	2.6 - 8
Quartet Thick Panel Frame	275	63	2.6 - 8
Duet Thick Panel Frame*	194	63	8+
Quartet Thick Panel Frame*	275	63	8+

* For panels thicker than 8mm, routing of the rear surface of the mounting panel is required.
